MECHANICAL
POWER MACHINE VISE

Mechanical Booster

Unique Ball design structure provides powerful clamping forces. Inside Disc-Spring to against shocks and vibrations while operation. High accuracy of tolerance ensures reliability and long durability.

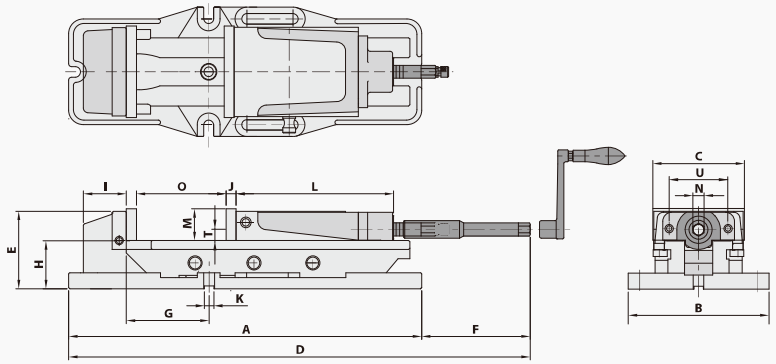

Rigid constructed suitable for machining such as mill, grind, drill and shape.

Easy operation could bring different clamping force.

Rigid and tensile vise body. Accuracy beyond others in the market.

Securely grips rectangular and irregularly shaped workpieces, minimizing setup time and lowering production costs.

HYDRAULIC
POWER MACHINE VISE

HP Vise is the first Hydraulic Power Vise in Taiwan. The hydraulic booster provides a steady clamping force against shocks and vibrations during the operations, since it fastens the work-piece securely with the aid of the Disc-spring mounted inside. Clamping force will never loose except to be done manually.

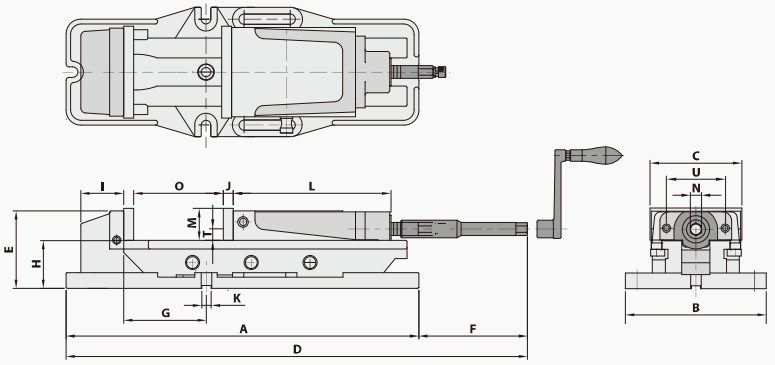

Suitable for every machine center. Can be change to non-Booster system.

Special design ensures the workpiece does not deflect and lift.

Rigid and tensile vise body. Accuracy beyond others in the market.

Securely grips rectangular and irregularly shaped workpieces, minimizing setup time and lowering production costs.
